

How to connect to SQL server management studio

1. If server name field is empty, you will click on drop down menu and choose browse for more as shown in the following photo.

2. Then, a window will appear to you, you will find option 'database engine'. So, click on '+' sign next to it to expand it. You will find your PC name so choose it.

3. Then, click ok to close the window and return back to the connect window.
4. After choosing server name, you will choose in the Authentication field 'SQL Server Authentication', login: sa, password: 1234567. Then click on connect.
